

Business Continuity Management

Strengthen your business resilience and ensure continued maturity of your BCM program to keep your organization prepared for disruptions today and in the future.

Corporater Business Continuity Management (BCM) solution is an enterprise-grade software that enables organizations to effectively manage their business continuity management activities, including risk assessment, business impact analysis, disaster recovery plan development, incident management, and compliance. It provides organizations with a centralized system to collect data, automate critical workflows, conduct business impact analysis, set up scenarios, plan exercises, manage incidents, develop recovery plans, and orchestrate recovery activities across the organization's business units.

Solution Highlights

- Establish a holistic BCM program
- Configure custom BCM dashboards to quickly access various areas of your BCM program such as policy management, compliance management, risk assessment, assets, processes, incidents, scenarios, third-party risks, ISO compliance (e.g., ISO 22301), and others
- Identify and govern your organization's mission critical processes and assets
- Proactively monitor and address risks and threats
- Develop detailed business continuity and disaster recovery plans to stay prepared for internal and external disruptions
- Improve operational efficiency by automating processes, workflows, alerts, notifications, and reporting
- Achieve an integrated approach to risk management

Trusted & Proven Technology

Corporater has been delivering business management solutions since 2000.

Flexible Configuration

Have it your way! Create a solution that fits your specific business requirements.

Rapid Implementation

Get up and running in weeks, not months, with Corporater ready-to-go accelerators.

Industry-leading Security

Corporater is V15 Veracode Verified and offers the highest level of data security.

Deployment of your choice

Select deployment option that fits your needs - SaaS, on premise, or private cloud.

Recognized by Top Analysts

Corporater is recognized by top industry analysts including Gartner.

Key BCM Areas Supported

Implement a holistic, digital BCM program to strengthen your organization's ability to respond to business disruptions. Configure custom BCM dashboards, conduct Business Impact Analysis (BIA), and generate Business Continuity Plans (BCP) to ensure your organization can continue to operate in case of incidents or disruptions, and is able to recover to an operational state quickly and in an efficient manner.

BCM Dashboards

Configure custom BCM and risk dashboards to have a big picture overview of potential risk events and their impact.

Assets and Processes

Govern inventories of assets and processes. Create lists of vulnerabilities, monitor trends, add comments, and generate reports.

Business Impact Analysis

Gather and input all necessary information needed for prioritization and development of scenarios and BIA.

Risk Register

Build and maintain a centralized risk register to have a complete and current overview of your risks.

Risk Assessment

Analyze, rank, and continuously quantify identified risks based on their probability of occurrence and quantitative effects.

Risk Evaluation and Treatment

Upon risk assessment users can suggest treatment actions. These can be associated with control measures and standards.

Scenario Planning

Create, plan, and manage scenarios and connect any number of processes and / or assets to them.

Scenario Dependencies

Understand and manage dependencies among assets / processes through tables and forms to aid in better prioritization.

Exercise Planning & Execution

Create and manage scenario-based exercises and let the system manage the workflow of when, where, who, and why.

Impact Monitoring

Display the results of your BCM activities (e.g. BIA results, recovery plans filing, etc.) on your BCM monitoring dashboard.

Internal Audit

Keep your Audit team involved in your BCM process. Generate reports serving as a proof of effectiveness of your BCM program.

Beyond BCM

Easily scale your solution to other GRC and performance management domains, such as enterprise or operational risk management.
